DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/26/05 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Crowley.

Crowley discloses a method for the production of administration forms that includes arranging tapes to a multilayered strand (see col. 5, lines 1-3) aligning and transporting the strand to a cross-cutting scissor (see col. 5, lines 3-6), positioning an empty pre-opened dispenser in a filling position downstream of the cutting device such that the open side of the dispenser faces a leading end of the multilayered strand (see Fig. 1 and col. 5, line 55 – col. 7); inserting the leading end of the stack into a pre-opened dispenser and transferring the stack directly into the pre-opened dispenser (see col. 6, lines 19-39).

Response to Arguments

Art Unit: 3651

4. Applicant's arguments filed 1/26/2005 have been fully considered but they are not persuasive.

5. The applicant states that Crowley does not disclose the spatial orientation of the empty envelopes or that the envelopes have an open side facing the leading end of the web. In response, see at least Fig. 1 illustrating the special orientation of the empty envelopes delivered off the roll facing the leading end of the web. The examiner notes that the claims do not limit elevations.

6. The applicant states that Crowley does not disclose positioning the pre-opened dispenser before cutting. In response, see at least col. 4, lines 13-40 which disclose verifying the proper dispensers receive the proper tapes before the tapes are severed. This occurs only if the dispensers are in a receiving position.
